ALOO SMP

60-Second YouTube Promo Editor’s Guide — Hinglish

Goal: first 3–5 seconds mein attention pakadna, story ko fast rakhna, aur viewer ko server join karne ka clear reason dena.

STYLE Indian Minecraft YouTuber • Casual • Funny • Fast-paced
FORMAT 9:16 vertical • 1080 × 1920 • 30/60 FPS source ke hisaab se
IMPORTANT Viral hona guarantee nahi hota. Yeh edit retention, clarity aur shareability improve karne ke liye hai.

Editor ke liye: voiceover ki natural energy ko priority do. Har second mein effect mat daalna — effects joke ya important moment ko support karein, voice ko overpower nahi.

1. Overall Editing Rules

• **Dead air cut:** Pauses, repeated words aur slow walking ke boring parts trim karo. Voice natural lage, robotic nahi.

• **Visual har 1–2 sec mein change:** Gameplay angle, crop/zoom, subtitle emphasis, meme insert ya action shot. Har cut random nahi — narration se match hona chahiye.

• **Captions:** Hinglish captions large, bold aur mobile-readable. Ek line mein ideally 3–6 words; important words ko alag colour/highlight karo. Captions face/UI ya IP ko cover na karein.

• **Sound balance:** Voice sabse clear. Music low rakho; SFX short aur punchy. Dialogue ke important words par loud meme sound mat chalao.

• **Gameplay proof:** Aloo SMP ke actual clips use karo. Features sirf tab dikhana jab server mein woh feature available ho.

• **No fake promises:** 'Best server ever' ya 'thousands of players' tabhi bolna jab true ho. Real community moments zyada believable hain.

2. Timeline — Second-by-Second Edit Plan

TIME	VOICEOVER / MOMENT	VISUAL + EDIT	SOUND / TEXT
0–3s	“Bhai, Minecraft mein itne servers hain… phir bhi ek achha server nahi mil raha tha!”	Start directly with character alone / looking around. First frame mein action; 0.2 sec ke andar caption. Quick punch-in on “Bhai”.	SFX: short record-stop or pop. Text: “SERVER MILA HI NAHI? ■”
3–8s	“Bade servers pe players bahut… par kisi ko jaante hi nahi!”	Show busy spawn for 1 sec, then hard cut to your lonely character. Split-second contrast; no long intro/logo.	Soft crowd ambience then quick comedic silence. Text: “Players: 1000 / Friends: 0”
8–15s	“Sab apna-apna khel rahe hain. Main sochta tha—karun toh karun kya?”	Show character wandering, opening inventory, or standing idle. Use 2–3 quick cuts, one tiny zoom for punchline.	Optional tiny vine-boom-style impact on “kya?”; use licensed/available SFX. Avoid overdoing meme sounds.
15–23 s	“Phir socha, khud ka SMP banate hain—friends bhi khelenge, naye log bhi join kar sakenge.”	Beat shifts from problem to solution. Show server lobby/building, then friend joining / group shot. Slightly smoother cuts.	Music lifts gently. Text: “TOH KHUD KA SMP BANAYA…”
23–32 s	“Aur bhai, wahin se shuru hua… ALOO SMP!”	Reveal with best clean server shot. Quick zoom-out or whip-pan into logo/server name; show real gameplay immediately after.	Beat hit on “ALOO SMP”. Text/logo on screen for ~1.5 sec, not a long intro.
32–42 s	“Survival, economy, custom enchants, PvP, crates… karne ko kaafi kuch hai!”	Match each feature word to its own clip: survival/base → shop/economy → enchant → PvP → crate opening. 1–1.5 sec each.	Use whoosh only on 1–2 transitions. Feature labels appear briefly. Show only features that are actually live.
42–51 s	“Friends ke saath khelo, apni team banao, base banao aur apni story start karo.”	Show funny group moment, teamwork, base reveal or friendly PvP. Prefer genuine player clips over generic stock footage.	Music warm/energetic. Text: “APNI STORY START KARO”.
51–60 s	“Toh bhai, Aloo SMP join karo! IP aur port screen pe hai. Milte hain game mein!”	End on active group shot, then clear IP/port card. Keep server address visible for 5–7 sec; no distracting effects over it.	Music resolves. SFX subtle. CTA: “JOIN ALOO SMP” + IP + PORT + Java/Bedrock info.

3. Music, Meme & Sound Effects

Specific copyrighted song ya movie dialogue blindly use mat karna. YouTube Audio Library ya editor ke licensed sound pack se similar sound dhoondo; upload se pehle rights check karo.

MOMENT	SEARCH / SOUND IDEA	USE KAISE KARNA HAI
Opening hook	“record scratch short”, “pop impact”, “comedy sting”	Sirf ek quick effect; voice ko cover na kare.
Lonely-player joke	“awkward silence”, “sad trombone short”, “cricket ambience”	Ek hi choose karo, 0.5–1 sec max. Joke ke baad lagao.
Server reveal	“cinematic beat drop”, “energetic gaming intro instrumental”	ALOO SMP reveal par beat hit sync karo.
Fast gameplay montage	“upbeat electronic gaming background”, “phonk instrumental clean”	Lyrics-free track safer/easier; cuts beat ke saath sync karo.
Transitions	“short whoosh”, “UI click”, “soft hit”	Har cut par nahi; sirf reveal ya feature change par.
CTA / end	Same background track ka clean ending / short riser	IP aur port ke waqt music aur effects low rakho.

Meme rule: meme insert 0.3–0.8 sec ka rakho. Overused meme clip ko full-screen lagane ke bajaye quick reaction zoom, subtitle ya sound cue use kar sakte ho. Copyrighted meme video/audio claim de sakta hai; licensed/original alternatives prefer karo.

4. Captions & Visual Style

• Font: bold, clean sans-serif (jaise Montserrat ExtraBold / Anton, agar available ho). White text + dark outline/shadow for readability.

• Keyword highlight: “1000 PLAYERS”, “0 FRIENDS”, “ALOO SMP”, “JOIN NOW”. Har word ko rainbow colours mat do.

• Safe area: subtitles centre-lower area mein, lekin bottom UI/buttons se upar. IP card ko centre mein high contrast ke saath rakho.

• Pacing: 0–15 sec mein sabse zyada visual changes; server reveal ke baad gameplay ko itna time do ki viewers features samajh saken.

• Transitions: mostly hard cuts. Random spin/glitch transitions har second mat use karo.

5. Voiceover Direction — Natural Indian Creator Vibe

• Voiceover ko ad jaisa mat padhna. Jaise friend ko Discord call par story bata rahe ho waise bolo.

• “Bhai”, “yaar” natural jagah par; har line mein slang force mat karo.

• Hook energetic ho, lekin shouting nahi. “ALOO SMP” reveal par excitement badhao.

• Har sentence ke beech tiny natural pauses rakho; breaths ko completely remove mat karo.

• Agar line boring lage, voice ko fast karne ke bajaye us line ke liye better gameplay shot choose karo.

6. Export & Upload Checklist

■ Vertical 9:16, 1080 × 1920; export H.264 MP4. Source 60 FPS hai toh 60 FPS export; otherwise 30 FPS is fine.

■ Voice clear aur distortion-free. Headphones par check karo; phone speaker par bhi captions aur IP readable hone chahiye.

■ First 1 sec mein logo intro nahi. First frame se story/action start honi chahiye.

■ End screen par correct IP, port, supported edition (Java/Bedrock) aur Discord link agar relevant ho.

■ Video ko post karne se pehle ek baar bina sound dekho (captions clear?), aur ek baar screen dekhe bina suno (story samajh aati hai?).

■ Upload ke baad audience retention, average view duration, rewatches, shares aur comments check karo. Next edit mein data ke basis par hook improve karo.

Final note

Koi editor viral hone ki guarantee nahi de sakta. Is guide ka target hai: strong first 3–5 sec, relatable story, quick visual proof, clean audio, aur simple CTA. Clickbait ya fake player counts use na karein — actual server experience hi promote karein.

EDITOR DELIVERABLE: 1 final 60-sec vertical video + 1 alternate first-5-sec hook for testing. Keep the rest of the edit identical so performance can be compared fairly.
